

## NEWS ADVISORY

Sept. 12, 2012

For immediate release

---

### **Building Permit System to be Closed Friday Afternoon, Sept. 14**

Contractors and homeowners planning weekend projects should be sure to purchase the necessary permits before noon on Friday, Sept. 14.

The City of Missoula's building permit system will be down Friday afternoon as City staff members take another step in the development of the new Accela Automation Permit & Asset Management System. The new system will replace the City's current system for permits involving building, engineering, excavation and business licenses.

Plans call for the new online system to go live in late September. Watch for complete information on the rollout later this month.
