Hillview Way Database Glitch Causes Errors in Mailing

The City of Missoula letter mailed last week to residents of the neighborhood around Hillview Way contained errors caused by a database glitch. The errors could be in property owners' addresses, property descriptions or assessments.

Property owners can expect a revised letter next week. In addition, the time schedule associated with creation of the Special Improvement District for the project will be extended, following discussion by the City Council at its regular meeting on Monday, Oct. 20. The new dates for the protest period and the public hearing will be included in the revised letters.

For information about the project, see the City of Missoula website project page at
<http://www.ci.missoula.mt.us/1793/Hillview-Way-Reconstruction-Project>.
