Summary Description and rationale of project and funding sources:						
<p>This request is to purchase land, approximately two acres, for a future building site of a fire station. With the extension of city services due to annexation and growth, the fire department will need to plan in advance to provide essential services. The fire department is currently working with Development Services and identifying and securing property in the Mullan/Wye area. In the Mullan Build project, we have identified an approximate location suitable for a fire station to service this area and provide more timely response to the Industrial Park and Airport.</p>						
History & Current Status: Impact if Cancelled or Delayed						
<p>Purchase of land for a future Fire Station is consistent with the guiding principles and strategies of the Fire Department's Master Fire Plan, City's Growth Plan, and the City's Strategic Plan. The Fire Department's Master Fire Plan notes that response times into expanded areas do not meet current levels of service. Particularly when consideration is given to a structure fire or multi-engine response. The Fire Master Plans developed in 2006 and again in 2019 identified areas for potential city growth and annexation. With that, the data and analysis of response modeling determined the need of an additional fire station and staffed engine company. This not only provides timely and adequate resources to meet the call volume in this geographic area. It also provides consistent and equitable response to the fringe areas.</p>
