Summary Description and rationale of project and funding sources:																																																																							
<p>In 2020, the City removed the Rattlesnake Dam and restored the floodplain. Phase 2 of this project includes completing the recreation plan for the site and complying with State and federal historic preservation requirements. Phase 2 includes developing 2-mi. of new trail and a new trailhead with a paved parking area at the end of Duncan Drive. It also includes design, engineering and construction of 3 interpretive kiosks and associated benches out of salvaged historic materials from the dam.</p> <p>History & Current Status: Impact if Cancelled or Delayed</p> <p>If trails to and around the restored Rattlesnake dam site are built without supplying a proper trailhead, damage to natural & built environments and impacts to the neighbors will increase. If historic materials & educational panels aren't reused on site the City will be out of compliance with State and federal permits and this may jeopardize ability to receive future Federal & State grant funding for City Projects.</p> <p>Are there any site requirements/ Potentially Affected Interest (PAI) Coordination:</p>
