Required	Engineering		Is the project APPROVED for Fiscal Year 2023?			FUNDED?	

Summary Description and rationale of project and funding sources:

If approved and installed, then this would be the first wayside horns installed in the State of Montana. This project will design, purchase and install equipment necessary to allow the Wayside Horns Project to be completed, thus silencing train horns, at this crossing except in emergencies. Funding for this project in amount of \$200,000 to be provided by MRA Hellgate Urban Renewal District.

History & Current Status: Impact if Cancelled or Delayed

The City entered into a contract with Triple Tree Engineering to develop a quite zone analysis for the railroad crossing at the Madison/Spruce/Greenough intersection and Taylor Street. Various options were analyzed and a Wayside Horn Demonstration was conducted. The demonstration proved viable information/data and is the most economical and timely option to eliminate the sounding of train horns. If delayed, train horns will continue to sound, as they currently do, adversely affecting public well fare.

Are there any site requirements/ Potentially Affected Interest (PAI) Coordination:

The wayside horns can be sited on Montana Rail Link (MRL) property, and coordination and permitting with MRL will be necessary. Some existing trees will have to be removed to provide for visibility between railroad train engineers and the wayside horn equipment.
