<b>Request Rating</b>	Expand Level of Service			
<b>Department Goal</b>	Operational Excellence			

**1. How will request assist in achieving Department Goal and benefit the customer**

Water service line replacements are critical to the Department's top priority of reducing leakage and thus decreasing our carbon footprint. Water services are the responsibility of the property owner and can create a significant financial burden to pay a contractor to replace the service line when it fails. Missoula Water created a Water Loan Fund as a tool to assist the customer with spreading out the high cost of a service replacement over a number of years. While the Loan Fund currently has available funds, Missoula Water anticipates increased demand for these funds resulting from a satellite leak detection survey by Utilis scheduled to occur during the summer of 2022. Any service line leaks identified during the Utilis survey will result in Missoula Water requiring the property owner to fix the leak. It will be critical to have a financing tool available to offer the property owner in those situations.

**2. What specifically is needed to achieve this goal?**

Transfer additional funds from the Water Enterprise Fund to the Water Loan Fund.
