Summary Description and rationale of project and funding sources:							
<p>This project has been approved and substantially complete. This project removed the dam, restored the creek/floodplain, and provided over 45ac. of new open space lands for public enjoyment. The project had significant public process and would not have been possible without Trout Unlimited (TU) leadership and fundraising. Missoula Water contributed a total of over 100K at \$25k/yr as well as significant labor resources. The City and TU secured a Federal Hazard Mitigation Grant, (HMGP) for ~\$716K and a \$125K DNRC grant. TU has undertaken significant other fundraising to meet and exceed match requirements, and is a subrecipient to the Federal award. Remaining work is interpretive and trail related and the last reimbursement from the</p>							
History & Current Status: Impact if Cancelled or Delayed							
<p>This project has been developing since 2017. Project partners (City, Trout Unlimited, and Mt. Fish Wildlife and Parks) have raised funds necessary to remove the dam, restore habitat, install onsite interpretive education and build some of the recreational trails. All plans and permits have been issued and the lower intake dam has been removed along with significant habitat restoration. The City and Trout Unlimited are working through the remaining reimbursement request from the federal grant award, including design and construction of an interpretive kiosk constructed from salvaged materials from the dam. The expense requested in FY23 is related to the final reimbursement for the HMGP grant. And then this CIP will be closed.</p>
