Summary Description and rationale of project and funding sources:

As part of the North Riverside Parks and Trails Plan the lawn area adjacent to the Caras Park pavilion is to be replaced with a flat lawn and seat wall. Stormwater will be installing a stormwater infiltration gallery under this lawn space in Fall 2021. Parks and Stormwater collaborated on design development to incorporate the park improvements into the existing project. City Council approved a contract amendment with the consulting engineers to add the park improvements to the design project. Prior year TBD/Private Investment funding comes from Missoula Downtown Association (MDA), The Business Improvement District (BID), and Downtown Foundation. Prior year Grant/Donation/Other funding comes from MDT payment related to Bear Tracks Bridge Improvements. Park District # 1 funds also supported this project via annual budget authority and debt financing.

## History & Current Status: Impact if Cancelled or Delayed

This project is strongly advocated and funded by the MDA, BID, and the Downtown Foundation. In order to limit disruption to park visitors, revenue generating events, to take advantage of design and construction efficiencies, Parks and Recreation, working with the Public Works department, pcombined the storm water project with certain park improvements to reduce overall design and construction costs. Based on quantity of scale, and other factors the estimated savings of constructing the projects at the same time is \$70,500.
