**Summary Description and rationale of project and funding sources:**

Project provides for engineering design and replacement of the concrete deck and pan, replacement of the electrical conduit and junction boxes, repainting, plus cyclical repairs and replacement of worn bridge parts. Cost to include a polymer deck coat to minimize impact of using salts/magnesium chloride for snow and ice control - plus it may help to reduce and/or remove graffiti.

**History & Current Status: Impact if Cancelled or Delayed**

The bridge was built in 1999 and was last repaired in 2010 to address cracks in the concrete deck, treat the deck pan with a rust inhibitor, and renovate the lighting and related electrical systems. The deck pan appears to be approaching the end of its useful life due to rust and will need to be replaced along with providing for renovation of worn/rusted bridge parts and electrical conduit.

**Are there any site requirements/ Potentially Affected Interest (PAI) Coordination:**

Closure of the bridge will be necessary due to the nature of repairs and renovation needed. Bridge closure will impact trail users as the detour route options are longer and rely on sidewalks adjacent to heavily traveled roads (Broadway and Russell).

**Is this equipment prioritized on an equipment replacement schedule?**

Is there going to be ongoing Operating and/or Maintenance costs upon completion of the project? **No**

(account for operational savings and/or reduction in current budget of previous operating/maintenance charges)
