

## B. Corridor Typology 1

Typology 1 Corridors have been identified to be redeveloped as mixed-use, pedestrian-oriented streets that support transit and prioritize placemaking. Walkability in these areas should be heavily emphasized. Mid-rise development is encouraged. Buildings are located to tightly frame the street with a consistent street wall, but some minor fluctuation in front setback is encouraged. Parking should be shared among multiple buildings wherever possible. High levels of transparency and detailing are promoted at the street level.
