Summary Description and rationale of project and funding sources:										
This project is necessary to mitigate transportation system safety and access deficiencies for nearby development. City staff has worked with adjacent planned and approved developments along Expo Parkway on their final traffic impact studies. These studies have identified the need for additional transportation system infrastructure to adequately serve and provide safe facilities for all modes of transportation. This project includes transportation infrastructure improvements that will benefit the new development and also existing users of the area's transportation system. New development will complete the design and construction work necessary and the City will reimburse costs attributable, from Transportation Impact Fees, to its percent share of the existing background traffic on the streets of Expo Parkway and Grant Creek Road per cost share agreements made with the new development										
History & Current Status: Impact if Cancelled or Delayed										
This project is needed for safety and access. These transportation system improvements are necessary to provide safety to mitigate existing crash trends that will be exacerbated by new development trips and complete existing infrastructure gaps to provide a complete street for all modes of transportation, including sidewalk, bike lanes, street crossings, and intersection improvements. If this project is delayed it will result in deficient infrastructure and lead users to choose vehicle trips as the only fully connected and viable mode of transportation limiting the ability of the City of Missoula to achieve it's mode share and vision zero goals.										
Are there any site requirements/ Potentially Affected Interest (PAI) Coordination:										
Additional right-of-way is needed from adjacent private property owners. Nearby and adjacent businesses will be affected during construction. The City will coordinate private property owner and public communication necessary as the project progresses.
