Summary Description and rationale of project and funding sources:									
The City Wastewater Resource Recovery Facility (RRF) has 12 separate Programmable Logic Controllers (PLC) that control major pieces of treatment equipment. The PLC's are a component of the Supervisory Control and Data Acquisition (SCADA) system. All of these PLC's are now obsolete and the Wastewater division wishes to replace them over a 5-year period.									
History & Current Status: Impact if Cancelled or Delayed									
Wastewater treatment facility rehabilitation and upgrades are imperative to prevent system failure and protect the water environment and public health.
