Summary Description and rationale of project and funding sources:						
<p>Phase 2 includes developing 2-mi. of new trail, and a new trailhead with a paved parking area at the end of Duncan Drive. It also includes design, engineering and construction of 3 interpretive kiosks and associated benches out of salvaged historic materials from the dam.</p>						
History & Current Status: Impact if Cancelled or Delayed						
<p>This project has been developing since 2017. Project partners (City, Trout Unlimited, and Mt. Fish Wildlife and Parks) have raised funds necessary to remove the dam, restore habitat, install onsite interpretive education and build some of the recreational trails. All plans and permits have been issued and the lower intake dam has been removed along with significant habitat restoration. The City and Trout Unlimited are working through the remaining reimbursement request from the federal grant award, including design and construction of an interpretive kiosk constructed from salvaged materials from the dam. Prior year funding is appropriated for expense in FY25 via the FY25 Parks CIP update form.</p>
